GILEAD | Medical Information

Biktarvy® (BIC/FTC/TAF) Coadministration with Crofelemer

This document is in response to your request for information regarding Biktarvy® (bictegravir/emtricitabine/tenofovir alafenamide [BIC/FTC/TAF]) and coadministration with crofelemer.

Some data may be outside of the US FDA-approved Prescribing Information. In providing this data, Gilead Sciences, Inc. is not making any representation as to its clinical relevance or to the use of any Gilead product(s). For information about the approved conditions of use of any Gilead drug product, please consult the FDA approved prescribing information.

The full indication, important safety information, and boxed warnings are available at: www.gilead.com/-/media/files/pdfs/medicines/hiv/biktarvy/biktarvy_pi www.gilead.com/-/media/files/pdfs/medicines/hiv/descovy/descovy_pi.

PK DDI Evaluation

This interaction has not been studied between the single-tablet regimen BIC/FTC/TAF and crofelemer. Based on the PK profile of each active ingredient within BIC/FTC/TAF and crofelemer, a PK interaction would not be predicted.[1,2] For more information about crofelemer, please refer to its product labeling.[1]

BIC/FTC/TAF PK[2,3]

DDI Mechanism		BIC	FTC	TAF
Drug Transporters	OCT2	Inhibitor	N/A	N/A
	MATE1	Inhibitor	N/A	N/A
	P-gp/BCRP	N/A	N/A	Substrate
	OATP1B1	N/A	N/A	Substrate
	OATP1B3	N/A	N/A	Substrate
Drug Metabolizing Enzymes	CYP3A	Substrate[a]	N/A	Minor Substrate
	UGT1A1	Substrate[a]	N/A	N/A

[a]A drug that is a strong inducer of CYP3A and also an inducer of UGT1A1 can substantially decrease the plasma concentrations of BIC. Similarly, the use of BIC/FTC/TAF with a drug that is a strong inhibitor of CYP3A and also an inhibitor of UGT1A1 may significantly increase the plasma concentrations of BIC.[2]

Relevant BIC/FTC/TAF Label Information[2]

There is no information in the BIC/FTC/TAF product labeling about the coadministration of BIC/FTC/TAF and crofelemer.

Available Data

There are no Gilead studies evaluating the coadministration of BIC/FTC/TAF and crofelemer.

Additionally, a literature search was conducted in Ovid MEDLINE, BIOSIS Previews, and Embase databases for studies published between 1946 and December 13, 2024 using search terms that included Biktarvy, bictegravir, emtricitabine, tenofovir alafenamide, crofelemer, and related search terms. No relevant citations were found.

Abbreviations

BCRP=breast cancer resistance protein
BIC=bictegravir
DDI=drug-drug interaction
FTC=emtricitabine
MATE=multidrug and toxin extrusion protein
OATP=organic anion transporting polypeptide
OCT=organic cation transporter
P-gp=P-glycoprotein
PK=pharmacokinetic(s)
TAF=tenofovir alafenamide
UGT=uridine 5'-diphospho-glucourosyltransferase
